# 2-TAKT DUO

## DESCRIPTION

2-Takt Duo is a semi-synthetic two-stroke oil designed for air-cooled two-stroke petrol engines. For mixing in petrol and engines with separate (injector) oil tank.

## PROPERTIES

2-Takt Duo is a semi-synthetic two-stroke oil with excellent anti-wear properties to ensure operation for the most demanding two-stroke engines. The additives help keep the engine free from combustion residues and deposits and prevent corrosion. 2-Takt Duo gives outstanding performance at high temperatures. 2-Takt Duo gives low discharge of smoke and emissions and excellent performance at low temperatures, and therefore performs extremely well in separate lubrication systems (injector) in severe cold. Can be used advantageously for engines with very high power output, such as racing motorcycles and scooters.

## RECOMMENDATIONS

2-Takt Duo is recommended for two-stroke engines working under high loads. For all land-based air-cooled two-stroke engines such as chainsaws, brush cutters etc. Recommended mixing ratio of 2 %, or according to the engine manufacturer's recommendation.

SPECIFICATIONS		
Analyses	Units	Results
Density at 15 °C	kg/m <sup>3</sup>	862
Flash Point	°C	96
Pour Point	°C	<-36
Viscosity at		
40 °C	mm <sup>2</sup> /s	63
100 °C	mm <sup>2</sup> /s	9.1
Viscosity Index		133
Ash Content	wt%	0.1
