# AdBlue

## DESCRIPTION

For catalysts on heavy vehicles. Ready to use.

## CHARACTERISTICS

AdBlue is used for most new diesel vehicles in Europe to reduce emissions of harmful particles. It is a clear, non-toxic solution based on the chemical urea. It is safe to handle and do not harm the environment. AdBlue is stored in a separate tank near the diesel tank and should not be added to the diesel tank.

## RECOMMENDATIONS

AdBlue is used in the advanced emission control technology found in the exhaust system called SCR (Selective Catalytic Reduction).

TECHNICAL DATA		
Analyses	Units	Value
Density at 20 °C	kg/m <sup>3</sup>	1090
Freezing Point	°C	-11,5
pH		9,8-10
